Additional Data

The state provides a report detailing surveillance data for every Florida county, which is available [here](#).

In order to make the daily COVID-19 report easier to download and more accessible, the daily report will now separate case line data in a separate PDF. Both reports will continue to be updated daily. The case line data report is available [here](#).

Florida long-term care facility data:

- The list of long-term care facilities with active COVID-19 cases is available [here](#).
- The list of long-term care facilities with deaths is available [here](#), which is updated weekly.

The antibody COVID-19 test results report will be provided once a week and contains county, race and lab information on antibody COVID-19 tests conducted in Florida. The report for antibody tests conducted by private health care providers is available [here](#) and the report for antibody tests conducted at state-supported COVID-19 testing sites is available [here](#).

The Agency for Health Care Administration added an additional tab to the [Hospital Bed Capacity Dashboard](#) to reflect hospitalizations with the primary diagnosis of COVID-19.

More information on a case-by-case basis can also be found [here](#).
