COVID-19 Question of the Day

Does my child need a negative COVID-19 test to return to school if they are positive for COVID-19 or have been identified as a close contact to a case?

The CDC does not recommend requiring a negative test result to return to normal activities. Your child will need a note to return to school from a licensed healthcare provider. For any questions, please refer to your child's school administration.

Prevention

One Goal One Florida asks all Floridians to join this important initiative by following these simple, yet effective steps to mitigate and slow the spread of the virus:

1. **Protect the vulnerable**, including the elderly and those with underlying medical conditions
2. **Practice proper hygiene**, including washing your hands
3. **Practice social distancing**, avoiding closed spaces and crowded places
4. **Wear a mask**, if you are in close contact with others

Additional Data

The state provides a report detailing surveillance data for every Florida county, which is available [here](#).

In order to make the daily COVID-19 report easier to download and more accessible, the daily report will now separate case line data in a separate PDF. Both reports will continue to be updated daily. The case line data report is available [here](#).

Florida long-term care facility data:

- The list of long-term care facilities with active COVID-19 cases is available [here](#).
- The list of long-term care facilities with deaths is available [here](#), which is updated weekly.

The antibody COVID-19 test results report will be provided once a week and contains county, race and lab information on antibody COVID-19 tests conducted in Florida. The report for antibody tests conducted by private health care providers is available [here](#) and the report for antibody tests conducted at state-supported COVID-19 testing sites is available [here](#).

The Agency for Health Care Administration added an additional tab to the [Hospital Bed Capacity Dashboard](#) to reflect hospitalizations with the primary diagnosis of COVID-19.

More information on a case-by-case basis can also be found [here](#).
