Panama City, Fla.— Bay County received confirmation of three additional cases of COVID-19, the novel coronavirus. The persons ill with the virus are a 57-year-old female, a 73-year-old female, and a 66-year-old male. This brings Bay County's total COVID-19 cases to 63, including 62 residents and one non-resident.

The Florida Department of Health in Bay County (DOH-Bay) is now conducting its contact investigation and working on identifying and notifying individuals who will need to self-monitor for symptoms for a 14-day period. Contact investigations are a critical way for staff epidemiologists to track and prevent the spread of disease.

While Bay County's testing is increasing, the percent of those testing positive for COVID-19 overall is 6%. Of the 1,020 tests processed, there are 950 negative results. There are two deaths in Bay County from COVID-19. The total hospitalizations count is at ten including nine residents and one non-resident.

There are currently two long-term care facilities in Bay County that have or have had positive cases of COVID-19. The Florida Department of Health has published the list at [FloridaHealthCOVID19.gov](https://www.floridahealth.gov/covid-19/2020/04/24/covid-19-positive-cases-in-bay-county.html). The twice daily COVID-19 report also includes information by county about cases and deaths related to staff or residents in long-term care facilities. There have been two residents or staff in long-term care facilities that have tested positive for COVID-19.

The addresses of the 62 positive Bay County residents include; 37 in Panama City, 12 in Panama City Beach, one in Southport, five in Lynn Haven, one in Parker, three in Youngstown, one in Tyndall Air Force Base, and two in Callaway. The non-resident case is from Texas.

Age, gender, race, and ethnicity data is available on the dashboard. Zip code level case numbers are also available. The dashboard is updated twice daily around 10:30 am and 5:30 pm. For more detail on Florida resident cases, please visit the live DOH Dashboard [here](https://www.floridahealth.gov/covid-19/2020/04/24/covid-19-positive-cases-in-bay-county.html). More information on a case-by-case basis can also be found in the Daily Report at [FloridaHealthCOVID19.gov](https://www.floridahealth.gov/covid-19/2020/04/24/covid-19-positive-cases-in-bay-county.html). We encourage all Floridians to take the COVID-19 Community Action Survey by visiting www.StrongerThanC19.com

COVID-19 symptoms and treatment

The symptoms of COVID-19 can mirror illnesses such as influenza. Patients with COVID-19 typically display symptoms such as fever (100.4°F or higher), cough, and/or shortness of breath within 2 to 14 days of exposure to the virus. Approximately 80% of those affected with COVID-19 report mild to moderate illness and experience a complete recovery. Some experience more severe illness. People who

are more vulnerable to the illness include individuals who are over age 65 with underlying health conditions, immunocompromised, ill or have underlying chronic health conditions, such as heart disease or diabetes.

Many cases of COVID-19 can be managed at home by treating symptoms, and this is encouraged. However, if you develop worsening symptoms, such as shortness of breath, chest pain, or inability to drink fluids, contact 911 and advise them of your symptoms as you may need treatment at a hospital.

COVID-19 overview, symptoms, and general prevention

COVID-19 is a new type of coronavirus; coronaviruses are a large family of viruses, some causing illness in people and others that circulate among animals. Other coronaviruses include the common cold and Severe Acute Respiratory Syndrome (SARS). COVID-19 is believed to have emerged from an animal source and is now capable of spreading from person-to-person. There is currently no vaccine to prevent COVID-19.
